Thank you for choosing this fine handcrafted wallcovering. For the best results, we believe that a professional wallcovering installer should hang these wallcoverings.

DESCRIPTION:
The beauty of richly woven wicker and raffia weaves available in VINYL - merging luxe design with the durability and technology offered by today’s performance wallcoverings.

PREPARATION:
Before you cut and hang, please be sure you have:
1. The correct wallcovering and the correct amount of wallcovering to finish the job.
2. Inspect the wallcovering carefully to ensure it is free of defects:
   - If no defect is evident before installation, the material should be inspected after three (3) strips are installed. If any defect is evident at this time (or at any point in the installation) no additional material should be hung until Phillip Jeffries is notified. NO CLAIMS WILL BE ALLOWED FOR MORE THAN (3) STRIPS ON THE WALL. All claims must be made within 30 days of the invoice date. No labor claims will be allowed at any time.

BUILDING & MATERIAL CONDITIONS: The building must be weather-tight with HVAC settings (including pressure, temperature and relative humidity) the same as those of an occupied building for three days prior to, throughout installation and three days after installation. The walls must be structurally sound including elimination of sources of moisture accumulation into the wall or wall cavity. The wallcovering must be in a clean and dry condition and must be stored at normal occupied building temperature and humidity for at least three days prior to installation. All adhesives and primers must be new, good quality, commercial grade materials, which have not been contaminated.

IF YOU HAVE ANY QUESTIONS, PLEASE STOP AND CONTACT PHILLIP JEFFRIES BEFORE PROCEEDING.

WALL PREPARATION:
1. The walls to be covered must be properly prepared to insure that the wallpaper will adhere to the wall surface. Even the strongest adhesive can only work when the wall surface is clean and properly prepared.
2. Phillip Jeffries recommends that installers use a hard, acrylic, pigmented, wall-protecting primer that is SPECIFICALLY made for WALLCOVERING INSTALLATION and WALL PROTECTION. DO NOT USE R-35.
3. Allow the primer to dry thoroughly before hanging.

INSTALLATION

ADHESIVE
1. We recommend a clear, pre-mixed vinyl adhesive.
2. Apply the paste to the back of the paper using a pasting machine, or for hand application a short napped paint roller. Pay particular attention to edges so they are sure to be pasted.
3. It is important to keep the face of the wallcovering free of adhesive.

TRIMMING
1. The edges have been pre-trimmed at the factory. However, you may wish to make a precision cut on the table or double cutting on the wall to create as fine a seam as possible.
2. The pre-trimmed width is 39.5" (100.3 cm.).
3. Trim edges with a VERY sharp razor blade. Change your blades often.

MATCH
1. Vinyl Wicker Checked 1357, 1358, 1359, 1360, 1361 repeat: 7" (17.78 cm.) V x 10" (25.4 cm.) H.
2. Vinyl Wicker Checked is a straight match. (See Diagram A)
3. Vinyl Wicker 1342-1356: No repeat. (See Diagram B)

TIPS
1. When hanging Vinyl Wicker Checked, DO NOT reverse the strips. Matched design may require being table cut for match perfection.
2. When hanging Vinyl Wicker, each alternate strip should be reverse hung. After three (3) strips are hung, carefully inspect the wallcovering. If the effect is not acceptable, re-hang the second strip without reversing.
3. Apply material above doors and windows as it comes off the roll, DO NOT SKIP.
4. A heat gun may be used to allow the vinyl to conform to irregular corners.
5. Remove excess adhesive and dirt from wallcovering surface and seams immediately, using a sponge or damp cloth frequently rinsed in clean, warm water.
6. Vinyl wallcoverings should be washed regularly to prevent dirt and grime from accumulating. Depending on traffic (light, medium, heavy), vinyl should be washed two or three times a year.
7. Ordinary dirt can be removed with mild soap and warm water. A bristle brush can be used to remove dirt from the crevices of deeply textured patterns. Dry wallcovering with a soft, lint-free cloth or towel. For more difficult stains that are only surface deep, the use of a stronger detergent is recommended. WE RECOMMEND ALL CLEANERS BE TESTED IN AN INCONSPICUOUS AREA TO INSURE COMPATIBILITY WITH THE WALLCOVERING.
